AGSVA SECURITY CLEARANCE — NV1

PROFESSIONAL SUMMARY

Over 18 years of hands-on experience in software development, including 6 years of Australian experience, and 5 years in leadership, spanning Web (Angular, Node.js, MVC, ASP.NET, .NET Framework), Cloud (Azure), and mobile (Android, iOS). Strong hold on current technologies, with a track record of adapting quickly to emerging ones — including AI-driven, agentic development workflows now used to accelerate full-stack delivery.

CORE SKILLS

- **AI Agentic Development** — AI-driven tools/workflows for full-stack delivery
- **Azure DevOps & Azure Portal** — resources, pipelines, CI/CD
- **Progressive Web Applications** — installable on Android, iOS, tablets & desktop
- **C#** clean code, **Entity Framework**, .NET factory pattern for DI
- **Angular 18+** / TypeScript development
- Token-based & **OpenID Connect / OAuth 2.0** auth
- 3rd-party integrations — **Instructure, Microsoft 365 CRM, Qlik Sense**
- Pixel-perfect, responsive UI with **HTML5, CSS3, SASS**
- **Git / GitHub** version control
- **AWS** — cloud infrastructure & tooling (Docker, RabbitMQ)
- **Microservices** architecture
- In-house **.NET packages** & **Angular libraries**
- Responsive front-end design based on Google **Material Design**
- **.NET 6+ Web API** applications
- **PrimeNG** — Angular UI component library
- **ABP Framework** — modular .NET application framework
- **MVC / MVVM** back-end design, ASP.NET form-based apps
- Relational database design & expert-level **SQL**
- 3D Web-GL development with **Three.js**
- **Agile Project Management** — certified, Australian Institute of Management
- **Python** — CI/CD YAML pipeline scripting & automation

PROFESSIONAL EXPERIENCE

Senior Software Developer — My Occ Health Record

Jan 2026 – Oct 2026

- Held AGSVA Security Clearance – NV1.
- Cleaned the git repository by removing SMS/email service credentials from the codebase, migrating them to AWS Parameter Store, and purging git history of all commits containing sensitive credentials.
- Worked as a Full Stack Developer, using AI agentic development tools and workflows to accelerate delivery.
- Built and polished the skills that AI agents use to generate refined, production-ready code with fewer hallucinations.
- Front end built on Angular with PrimeNG, back end built on .NET using the ABP Framework, with Node.js for supporting services.
- Infrastructure and tooling included **Docker, RabbitMQ and AWS**.
- Wrote **Python** scripts for CI/CD YAML pipeline automation.
- Delivered a full data migration project for **Defence Force Recruitment**.
- Held regular meetings with the **Defence Force Recruitment** team to discuss requirements.
- Automated DFR's recruitment process for the **ADECCO** client.
- Delivered solutions for additional clients including **Orica**, **Bodycare**, and **Adecco**.
- Regularly interacted with stakeholders and the product team.
- Performed routine pull request and code review tasks.

Lead, Software Development (Full Stack) — Independent Schools Victoria

Oct 2022 – Dec 2025

- Successfully deployed the new isEducation platform for **Independent Schools Victoria**, built on the latest technologies in my skill set — led project development (education.is.vic.edu.au).
- Developed in-house Angular TypeScript libraries, Node.js services, and .NET NuGet packages.
- Managed a team of developers and cloud engineers building solutions for schools/organisations.
- Regular interaction with stakeholders and non-technical staff.
- Certificate in Agile Project Management.

- Led the transition of the isEducation suite from an old MVC "monolithic architecture" into a new Angular PWA-responsive front end and .NET API — "microservices architecture".
- isEducation suite runs on an Azure B2C tenant, with OAuth 2.0 authentication/authorization — isEducation acting as the OAuth 2.0 server and suite apps as client applications.
- Led environment setup (Dev / UAT / Staging / Production) for the isEducation suite, including Azure Portal resource creation and deployment.
- Built per-app, per-environment CI/CD pipelines.
- Authored **Python** automation scripts to streamline CI/CD YAML pipeline workflows across the isEducation suite.
- Collaborated with developers and cloud engineers building solutions for schools; ran weekly scrums to track development and deadlines.
- isEducation suite products include **isLearn**, **isAnalyse**, **isConnect**, **isCommunicate**, **isRecruit**, **isPodcast**, **isArtwork**.
- API integration with 3rd-party tool Qlik Sense Analytics.
- Maintained the legacy isEducation suite built on Blazor WebAssembly and .NET Framework.
- Developed and released versions of the Xamarin Android app isCommunicate on Google Play.

Senior Developer (Full Stack) — ComputerShare **May 2020 – Sept 2022**

- Worked within **ComputerShare**'s Utility department.
- Collaborated with a team of senior developers and a solutions architect building client solutions.
- Ongoing discussion with business analysts to maintain project scope.
- Built admin dashboards with charts and analytics data.
- Systems provided billing services for the energy industry (gas, electricity, water) for clients including **EnergyAustralia**, **UnityWater**, **HunterWater**, **Portsmouth Water** (UK).
- Progressive Web App built on Angular 13, Node.js, .NET 6, C#.
- Built field-sales apps for clients, generally including bill comparison.
- Ongoing support and monitoring of production systems.
- Used in-house package libraries (Angular and .NET).
- Maintained CI/CD pipelines on Azure.

Full Stack .NET Developer — CPM Australia (now Symbos) **Jan 2019 – Apr 2020**

- Worked alongside an established team of developers, marketing, graphic designers and business analysts.
- Revamped the entire UI/UX for all applications used at **CPM**, including mobile apps.
- Developed a CRM to manage in-bound calls for the in-house **L'Oréal** CRM portal, and continued developing CRM features for **L'Oréal** employees.
- Developed CRM features for **Optus**, **American Express**, **Subaru**, **AGL Gas**, **Saputo**.
- Monitored servers and reporting alongside the infrastructure team.
- Developed iOS/Android apps using Apache Cordova.
- Web development using MVC, ASP.NET, JavaScript/jQuery and other JS libraries; .NET Core and Angular apps.
- Worked in an Agile Scrum environment.
- Expert-level SQL for updates, inserts and report generation.
- Provided ongoing support to **AMEX** sales representatives.
- Built Angular dashboards with .NET Core and live updates.
- Developed prototype UI/projects presented to stakeholders for future clients.
- Relational database design — new builds and upgrades to existing databases.

Full Stack .NET Developer / Director — ExpertSystems Ltd (NZ) **Sept 2013 – Jul 2018**

- Developed various websites hosted on Windows hosting servers.
- Responsible for client interactions and people management, including rollout timelines and performance feedback.
- Implemented security role-based authorization and authentication.
- Developed an online roster system with duty cards for **NZ Bus** (reference available).
- Web design from scratch using Bootstrap, HTML5/CSS3 for fast-paced development.
- Graphic design for jerseys, logos, business cards, posters, wine bottle branding and magazine advertisements.
- 3D Web-GL development to render architectural designs using Three.js, CSS3, HTML5.
- Software development, maintenance and monitoring of functionality, design and architecture.

Earlier Career — Freelance, Contract & Design Roles **2006 – 2011**

- **Team Sports Ltd** — Graphic Designer, contract (May–Nov 2011) — Licensed distributor for Adidas, Reebok, SMAI, Flexfit, Rawlings, Aerobie and Nordic (500+ products); designed posters and product graphics (A1/A2/A4), edited product photography, and maintained the company website and online store.
- **Silver Fern Sports Ltd** — Sports Apparel Designer, part-time (Jan–May 2011) — Created vector-based apparel designs for manufacturing and client-approval mockups using Adobe Illustrator and Photoshop.
- **MyBiz Websites Ltd** — Web Administrator / Designer, full-time (Oct 2009–May 2011) — Grew the company from sports-club sites into small-to-large business web development; designed flyers and posters; built and maintained 20+ client and sports-club websites using Business Catalyst and Joomla CMS.
- **biscoPro – Building Integration Software Ltd (now YourQS)** — Programmer (Feb–Sept 2009) — Built an application using the Google SketchUp API and Ruby to generate XML coordinate, texture, colour and curve data for 3D models; also developed client websites.
- **Dell Computers** — Documents Administrator (Feb 2006–Feb 2007) — Processed Reps and Certs documents in the Analytics department; edited scanned files in Adobe Acrobat, adding required annotations.

PERSONAL PROJECTS

ChatnYou — Real-Time Chat Platform **chatnyou.com**

ASP.NET Core 9 · Angular 22 · Node.js · SignalR · OpenIddict (OAuth 2.1/OIDC) · SQL Server · EF Core

- Architected a service-oriented backend with a decoupled OAuth 2.1 Authorization Server and Resource Server — independent databases, CI/CD pipelines, and enforced PKCE on 100% of OAuth clients.
- Designed a custom CQRS-style mediator/dispatcher pattern with auto-discovered handlers, letting new features ship as isolated additions rather than edits to shared code.
- Built real-time messaging and presence tracking with SignalR, powering live chat, unread badges, and online-status updates across concurrent user sessions.
- Delivered a two-way user-blocking feature end-to-end (schema → API → real-time push → UI), backed by 14 new automated tests with zero regressions across a 90-test suite.
- Hardened the API with tiered rate-limiting (per-IP/per-user) and an automated content-moderation layer (PII/contact-info + profanity detection) applied to every message.
- Cut production bundle risk by lazy-loading a third-party UI library (~12.5kB) on demand, keeping the Angular app inside its CI-enforced size budget with zero impact to initial load.

EDUCATION

A.I.S. St Helens	Graduate Diploma in Information Technology (Level 7), 10/2007 — Enterprise Award for all-round excellence, determination to succeed and general team spirit.
Punjab Technical University	Bachelor's Degree in Computer Science, 9/2006
Holmesglen Institute, Chadstone	Cyber Security (partial, one semester completed)
Australian Institute of Management	Certificate in Agile Project Management, 1/2025
